TRIDENT HEALTH RESOURCES, INC. ANNOUNCES INTRODUCTION OF NEW GENERATION PERFUSION SOFTWARE **Vivo**_{RT} AT PROFESSION'S ANNUAL AmSECT MEETING-ORLANDO, FL

April 9, 2008 (Dunedin, FL). Trident Health Resources, Inc. has announced it will introduce the perfusion module of **Vivo**_{RT} software to the marketplace this summer. **Vivo**_{RT} is a data management solution for mining, charting and information tracking with virtually all operating room perfusion-related equipment.

Vivo_{RT} supports multiple types of hardware and enables operators increased data collection and reporting like no predecessor has. "This is the result of ongoing development, fine tuning and testing in a number of hospital environments," said Ralph Jordan, Trident's CEO and President. Described as the brainchild of a joint partnership between Trident with Lineal Concepts, LLC. **Vivo**_{RT} was developed in response to the increased technological needs in the industry.

With 20 years under the same ownership, Trident Health Resources, Inc. has consulted with perfusionists, cardiovascular surgeons and staff to accommodate a broad spectrum of equipment models with the program. "Virtually any OR equipment with data output capabilities can be integrated and supported," said Sean Gallagher, Founder and Software Developer of Lineal Concepts, LLC.

This technology will give its users a new level of freedom in data management. **Vivo**_{RT} will be supported and ensure that a single system can power a growing array of operating room scenarios.

It is projected that demand for this proprietary data management software will soar and these next several months represent a critical period of final preparations before Trident, the exclusive distributor, will introduce it to hospitals across the country.

Trident Health Resources, Inc. provides 24 hour coverage, 365 days per year for all open-heart procedures on both a locum tenens and long term contract basis. Since 1988, Trident introduced what is now a clearly proven concept that works: hospitals using outside, certified providers of cardiovascular technology and advanced services.
